Work experience

System Administrator / Back-end Developer
2017 - 2019

Marnet d.o.o. - Varaždin, Croatia

I have had the privilege to gain my internship at this company. After a successful completion of my internship, I began working and learning as a junior system administrator and back-end developer. Later on I qualified to become the CTO of video surveillance with the certificate in technical security.

Working at Marnet I gain the following expertise:

- Setting up and maintaining the systems hardware equipment
- Installing and developing the video surveillance systems and technical security protocols.
- Structural networking and system cabling.
- Network maintenance.
- MVC approach in Java programming language

Restaurant worker / Shift manager
2016 - 2017

Global Food d.o.o. - McDonald's Croatia

In this company, I gain experience in the following fields:

- Team management - leading the teams of people through food preparation and service.
- Managing HACCAP systems.
- Direct communication with the restaurant.
- Co-operating with other shift managers for the benefit of complaint settlement and shift re-organizations.

Education

Computer Technician
2010 - 2014

Electromechanical School in Varaždin

Thesis: Electronic Roullete

Computer Science
2014 - 2018

Polytechnic of Međimurje in Čakovec

Thesis: Smart house with Arduino platform
